

Our National and International Connectivity Services

National Optical Backbone

The Telindus Telecom optical DWDM rings interconnect the main datacenters of the country as well as the principal business areas. Thanks to this global coverage all the connectivity services are proposed:

- Local tails and leased lines
- Point to Point services Ethernet, Fiber Channel, Ficon Sysplex,...
- Internet: Single or dual accesses
- Voice services

International Network Services

As part of the Belgacom Group, Telindus Telecom offers international connectivity services:

- International Private IP Network (MPLS)
- International high speed services
